

User stories

- Bibbla

In following text, the word 'book' has been used as an example for all kinds of media of which the Gothenburg City includes in their Library.

All users:

As a user I would like to:

- search for a book and straight away, in my search result, see if it is available. Also find out where.
- rearrange my search result information by title, author or media type.
- make an advanced search which would give a more narrow result based on the more specific information.
- see more detailed information about a book by clicking on the space in the list which is reserved for information about the item.

As a user I would like to:

- find out where the closest library is situated. I want it shown on a map in relation to where I am.

As a user I would like to:

- log in (or in the case that I am already logged in, I would like to log out).

Logged in users:

As a logged in user, I would like to

- view a summary of my account, with my reserved books and loans. I would also like to view some information of my account in itself, if I have any debts, and be able to log out.
- delete certain reservations while reviewing all of my reservations.
- extend certain loan(s) while reviewing all of my loans.

Closing Application:

Upon closing the application, date and time and current page will be stored.

Opening the application:

Upon opening the application, application will check if it has been open in the last 12 hours. If so, it will restore to the last page it was on. If not, application will start new session at the start page.
